

④ The Quadrant

1. Cut out the quadrant, the sights, the handle and the star.
2. Glue the quadrant template firmly to a piece of card
3. Glue one sight to the glue tab marked on the straight edge of the quadrant.
4. Glue the other sight to the back of the quadrant, in exactly the same place, so the two prongs line up.
5. Fold the handle strip along the dotted lines to form two tabs.
6. Glue these tabs to the back of the quadrant, so the handle is parallel to the straight edge with the sights.
7. Tie the bead to the string at one end.
8. Tie the other end of the string to the quadrant through the hole in the corner.

⑤ **Warning!** You should never look directly at the Sun.
It can make you blind.
