

Recipe for homemade snow

Ingredients

2 cups corn flour

1/3 to 1/2 of a cup vegetable oil (as needed)

Method

1. Place all the ingredients into a medium sized mixing bowl.
2. Mix ingredients together with a spoon until they are properly combined.
3. Using your fingers, rub the oil into the flour until it feels smooth.
4. Your snow is ready to play with when it starts to hold a form when you mould it.

*You can adjust the quantities to create more or less snow as needed.
