2021

New for 2021

It is with great excitement that Royal Museums Greenwich announces the list of publications planned for 2021. The list of books presented in this catalogue showcase world-leading expertise, fascinating stories and beautiful artworks inspired by the sea, ships, time and the stars. Every purchase supports the Museum to help fund research, exhibitions and acquisitions.

We hope you enjoy reading them as much as we've enjoyed producing them.

Dressed to Kill

British Naval Uniform, Masculinity and
Contemporary Fashions, 1748-1857

Dr Amy Miller

Updated and expanded, this is the long awaited second edition of Dr Amy Miller's definitive exploration of naval identity and masculinity. Boasting more than 100 images of the National Maritime Museum's extensive uniform collection, along with a selection of patterns, this unique publication analyses the historic origins of British naval uniform and its influence on contemporary fashion.

1 October 2021
ISBN 978-1-906367-87-9
£30.00, paperback
230 x 170 mm, 240pp, 100+ colour photos
Categories: Military Uniforms and Insignia,
Fashion and Textile Design, Maritime History
Thema code: JWTU, AKT, NHTN

Pirates

Fact and Fiction

David Cordingly and John Falconer

The image of the pirate never fails to capture the imagination. The cut-throat robbers of history who plundered richly laden merchant ships are legendary. But piracy was more brutal and rebellious than some of the best artistic descriptions let on. This new publication is the first port of call for anyone keen to separate the fact from the fiction.

Royal Observatory Greenwich Illuminates series

Royal Observatory Greenwich Illuminates is the brilliant new astronomy series from experts at the renowned home of time and space. The Observatory's very own team of astronomers have written a whole host of accessible guides to everything in the cosmos, from stars and planets to the exploration of space! This exciting new series from the Royal Observatory in Greenwich launches in 2021 with five fascinating titles, with more due to land in 2022.

'As a concise introduction, *Planets* manages to cover an impressive amount and will undoubtedly leave the reader keen to learn more.'

BBC Sky at Night

Stars

Royal Observatory Greenwich
Illuminates series

Dr Greg Brown

Whether stargazing with the naked eye or observing deep space with the largest telescopes in the world, humans have a seemingly never-ending fascination with the stars. But it's only in the last century or so that the natures of these distant lights have been revealed. How are stars born and how long do they live? Find out as astronomer Dr Greg Brown illuminates us about the lives of stars.

February 2021

Planets

Royal Observatory Greenwich
Illuminates series

Dr Emily Drabek-Maunder

From a planet with a hexagonal storm to the home of the Solar System's largest volcano, our neighbouring bodies are unique and fascinating places. Could there be life on Mars? How many planets are there outside the Solar System? There's still much we don't know about the Universe but astronomer Dr Emily Drabek-Maunder shows how far we've come in this essential guide to planets.

Space Exploration

Royal Observatory Greenwich
Illuminates series

Dhara Patel

Over the past 70 years, drastic leaps in technology have revealed the deepest parts of our solar system and seen humans step foot on the Moon. What have we learnt from sending people and robots into space? From the early Apollo ventures to commercial spaceflight, Dhara Patel's concise history highlights incredible breakthroughs as well as contemplating future endeavours.

The Sun

Royal Observatory Greenwich
Illuminates series

Brendan Owens

Explore the star on our doorstep, charting the journey from ancient superstition to the deep scientific mysteries yet to be resolved. Astronomer Brendan Owens examines the features and processes at work in the Sun, revealing the interconnected sciences involved in finding out more about it and the practical importance of doing so for our modern world.

Black Holes

Royal Observatory Greenwich
Illuminates series

Dr Ed Bloomer

Black holes are often clever plot devices in science fiction media, but these peculiar objects are real, although fiendishly tricky to comprehend. Starting with the basic principles, astronomer Ed Bloomer provides an accessible guide to one of space's most notorious concepts, with a bit of time travel thrown in. Read on for the fate of the Universe, how to win a Nobel prize and even what to do if you fall into a black hole!
