

# Examples of mission patches

Astronauts have logos designed for their specific mission. They wear these on their spacesuits. They often include the name of the mission, the people that went with them, pictures of the spacecraft used, or the location they travelled to.

Can you see the  
mission patch on Mae  
Jemison's space suit?

# Mission badge for Gemini 4

James McDivitt and Ed White used this when they went to space in 1965. It was the first time an American did a spacewalk, can you see the astronaut leaving the spacecraft in the picture?

# Mission badge for Apollo 11

Neil Amstrong, Michael Collins and Edwin (Buzz) Aldrin used this when they landed on the Moon using a spacecraft called the Apollo Lunar Module in June 1969. The Eagle is a symbol of America. What else can you see in the picture?

# Mission badge for STS-135

Christopher Ferguson, Doug Hurley, Sandra Magnus and Rex J. Walheim used this when they travelled to the International Space Station using a spacecraft called the Space Shuttle in July 2011. This was the 135<sup>th</sup> and last mission for the Space Shuttle. Can you spot the numbers 135?

# Mission badge for SpaceX Crew-6

Stephen Bowen, Warren Hoburg, Sultan Al Neyadi and Andrey Fedyaev used this when they travelled to the International Space Station using a 'Crew Dragon' spacecraft in March 2023. Can you see the dragon in the picture?
