Go to the Meridian Observatory. Here you will find many telescopes. Astronomers used these to look at the stars, the Moon and the planets.

Try and find these telescopes! The biggest one is upstairs past the shop – it is the biggest one of its type in all of the United Kingdom! Each picture has one fun thing to look at nearby.

Can you find a famous astronomer called Edmond Halley?

How many clocks are in this room?
Watch the video in this room to see the man open the roof so that he can look at the stars!

Look at the videos of pictures of the Moon. This is what it looks like to see through this giant telescope!

How many telescopes have you looked at?///
