Go to the space mission stand. Form a team of three and decide who will be Chief Engineer, Lead Scientist and Comms Officer.

**Have a go at building a probe**

**Tick the type of probe your team chose to build:**
- Venus Explore
- Comet Collider
- Ganymede Express

Was your mission successful? Why?

Why do you think we make probes that we launch into space? What kind of things do they do?
Do you think we should send people instead of probes? Why?///

Go to the Astronomy Questions gallery and sit at the Astronomers table. Select The Solar System and Exploring New Worlds.

How did astronomers collect information about Saturn’s largest moon, Titan?///
